

SAHIL SARMALKAR

sahilsarmalkar99@gmail.com — +91 9588423093 — LinkedIn — GitHub

PROFESSIONAL SUMMARY

AI Engineer and Full Stack Developer with experience building Agentic AI systems, RAG applications, MCP-powered workflows, and scalable web platforms. Skilled in designing production-ready architectures, optimizing performance, and delivering business-focused software solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: MongoDB

Agentic AI: LangChain, LangGraph, MCP (Model Context Protocol), Multi-Agent Systems, Workflow Orchestration, Tool Calling

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

NEXACRFT AGENCY

On-site

Tech Lead & Full Stack Developer

Mar 2026 – Present

- Led development of production-grade web applications using React.js, Node.js, Express.js, and MongoDB.
- Designed scalable software architectures, REST APIs, and database systems for client projects.
- Improved application performance through caching, lazy loading, image optimization, and efficient API design.
- Built authentication systems, admin dashboards, payment integrations, and role-based access controls.
- Mentored developers, conducted code reviews, and collaborated with clients to deliver scalable business solutions.
- Architected reusable component systems and development workflows that accelerated project delivery and maintainability.

EDUCATION

St. John College of Engineering and Management

2023 – 2027

Bachelor of Engineering in Artificial Intelligence & Machine Learning

PROJECTS

The Slap Cosmetics Platform

GitHub

Brand Commerce Platform

- Built a dedicated online sales platform enabling a cosmetics brand to manage products, orders, and customer interactions efficiently.
- Improved customer experience through optimized product discovery, streamlined checkout flows, and scalable backend architecture.
- Implemented optimized API communication and state management to improve responsiveness under increasing traffic.

Celestia E-Commerce Platform

GitHub

Full Stack Commerce Platform

- Developed a scalable commerce ecosystem for product management, order processing, payments, and customer operations.
- Optimized APIs, database structures, and application architecture to improve responsiveness and support business growth.
- Developed secure user authentication, authorization, and order management workflows for business operations.

Codebase Chatbot

GitHub

RAG, LangChain, Vector Databases

- Solved the challenge of navigating large codebases by enabling natural language interaction with repositories and documentation.
- Built a Retrieval-Augmented Generation pipeline using embeddings and vector search for context-aware code understanding.

AI Trip Planner

GitHub

LangGraph, MCP, Multi-Agent Systems

- Automated travel planning through collaborative AI agents capable of itinerary generation, budgeting, and recommendation tasks.
- Designed multi-agent workflows with reasoning, state management, and tool integration using LangGraph and MCP concepts.
